To Whom It May Concern:

Vulcan Materials in Corona, California has been using Slipcoat-ARA, Asphalt Release, since 2009. We use a powered hand sprayer to apply the product directly to our drag slats. The Slipcoat-ARA product greatly reduces sticking of the HMA to the slats and lubricates the components of the drag slats. This has reduced wear on our equipment and extended the life of our equipment.

Sincerely,

Jesus Rubio
Vulcan Materials
